Transferring heights, locating metal, plastic, electric cables - whatever the demands placed on Bosch Measuring Tools, it performs phenomenally well on all counts, reliability and economics included. No wonder these intelligent and precise measuring tools have become the preferred choice for industry professionals and precision experts around the world.

# Detector

Compact solution for safer drilling

Wherever drilling is required, inductive detection provides additional safety for the operator. The DMF 10 Zoom with the unique "Zoom" function accurately detects metal objects, wooden substructures, live and non-live power cables hidden in masonry, thus putting an end to expensive drilling damage and enabling safer drilling. The detector provides intuitive operation and includes added features like the high-resolution 5-segment display panel, LED ring and the integrated marker pen.
